EVOLUTION International is the leading French exporter of cattle genetics, a supplier of genetic advance for more than 50 years. With its network of partner distributors covering more than 70 countries, EVOLUTION International aims to be one of the top 5 exporters of animal genetics in the world.

YOUR PARTNER FOR:

DAIRY, BEEF AND GOAT GENETICS

TECHNICAL SUPPORT

To advise you, ensuring you have the best genetic advance

All of the technical experts of EVOLUTION International and our partners (Breed Selection Enterprises) are here to advise you, to provide you with the genetics that are the most suited to your needs in cattle and goat species.

GENETICS

Successful breeding programmes at the service of livestock farming

EVOLUTION International offers you the best of genetics for:

► Cattle breeds:

- Dairy or dual purpose: Holstein, Normande, Brown Swiss, Pie Rouge
- Hardy dairy : Abondance, Tarentaise
- Large format beef: Limousin, Charolais, Blonde d'Aquitaine
- Hardy beef: Aubrac, Gasconne, Salers
- Specialized beef : Parthenaise, Bazadaise, Rouge des Prés
- Beef crossing : INRA 95, Charolais Excellence, Blonde d'aquitaine, Limousine

► Goat breeds :

- Dairy: Saanen, Alpine
- Beef: Boer

EMBRYOS

Genetic advance in fast motion

To ensure maximum genetic advance, EVOLUTION International brings you a wide range of embryos that covers all their dairy and beef breeds. From dams with confirmed potential and the best bulls, these embryos will be the guarantee of success for your herds.

MATERNAL QUALITIES

The **Maternal Qualities** range brings together the bulls that have undergone a progeny test to assess their maternal and beefing abilities. According to profiles, you will find the bulls in the segments:

- **Efficiency:** corresponds to breeders who are looking for replacement females with excellent maternal qualities, synonymous of profitability.
- **Type:** for breeders who are seeking to bring morphology to their herd.

GENOMICS BULLS

These bulls have gone straight to catalogue but already have new genomic selection values. The range offers a big opportunity for your farm— recent-generation bulls, with new or proven pedigree and very high potential.

POLLED RANGE

This **Polled** range is the result of several years of the introduction of the polled gene into our breeding programmes. Our intention is to combine animal wellbeing with better working conditions for livestock farmers, and at the same time keeping technical performances equivalent to horned bulls.

This range is extended year by year to offer you a wider selection of easy-to-use polled bulls (heterozygous).

CROSSING RANGE

The **Crossing** range is intended for breeders interested in crossbreeding. It is the answer to a variety of needs:

- **For dairy:** for breeders who are looking for animals with early muscularity and growth, from the first weeks of life of the calf. Ideal for both dairy and suckler herds, ready for slaughter at less than 12 months.
- **Heavy growth:** for breeders who are looking for growth, weight and carcass yield. Ideal for both dairy and beef herds, with slaughter before 12 months of age.
- **Maternal Cross:** for breeders who want to improve the overall performances of their herd by producing crossbred females. Ideal for 1st generation and absorption crossing.

PEDIGREE RANGE

The sires of the **Pedigree** range come from families recognized as being great bloodlines in the breed. They stand out by their remarkable morphology observed on important shows or through their progeny.

EXCELLENCE

The best genetics
in the world

RELIABILITY

Animals with proven
and reliable potential

DIVERSITY

A range of different bulls which
satisfy all expectations

We are the only ones to do it!
**No bull is distributed unless
his progeny has been tested
on station.**

With the on-station testing,
the environmental effects are
controlled. What is measured
is the real genetic potential
of our sires.

THE FRENCH LIMOUSIN...

LIMOUSIN BREED SELECTION IN FRANCE

- > The most reliable breeding programme in the world
- > 153.000 dams in performance testing
- > Progeny testing on each sire distributed

A UNIQUE BREEDING PROGRAMME

Selection pressure taken to extreme lengths to achieve
excellence :

MATERNAL QUALITIES | 19

BULLS OF TOMORROW

These bulls have gone straight to catalogue but already have new genomic selection values. The range offers a big opportunity for your farm— recent-generation bulls, with new or proven pedigree and very high potential.

POLLED RANGE

This **Polled** range is the result of several years of the introduction of the polled gene into our breeding program. Our intention is to combine animal wellbeing with better working conditions for livestock farmers, and at the same time keeping technical performances equivalent to horned bulls.

This range is extended year by year to offer you a wider selection of easy-to-use polled bulls (heterozygous).

CROSSING RANGE

The **Crossing** range is intended for breeders interested in crossbreeding. It is the answer to a variety of needs:

- **For dairy:** for breeders who are looking for animals with early muscularity and growth, from the first weeks of life of the calf. Ideal for both dairy and beef herds, with slaughter before 12 months of age.
- **Heavy growth:** for breeders who are looking for growth, weight and carcass yield. Ideal for dairy and beef farms which fatten animals with slaughter at more than 12 months.
- **Maternal Cross:** For breeders who want to improve the overall performances of their herd by producing crossbred females. Ideal for 1st generation and absorption crossing.

GAEC DU BREUIL ST MAURICE

HOURRA

BULL FOR HEIFERS

- Excellent easy calving
- Good carcass conformation
- Fines bones and conformation

ON DIT X HIGHLANDER

FR4949411548

02/09/2008

EARL DRU PHILIPPE

DIMOIIII

FOR SAFE GROWTH

- Very good calving ease
- For mixed beefy type animals
- Fertile and high-yielding females

NEUF X MICMAC MN

FR2942852535

06/11/2008

GAEC EVEN

DAMONA

FOR YOUR HEIFERS

- Excellent calving ease
- For replacement females
- Very good milk production

ULYS MN X ELEAZAR

FR5382582099
